Data Analysis

(i) ... analysing the quality of data for conducting experiments

experiment	data availability	data completeness	data accuracy	data timeliness	data consistency	data validity	data uniqueness

Generali

- type: processed data, application data
 worktable type: work_table_type_id value in t720 table 1(import), 2(export), 3(pControl), 4(static), 5(reconciliation)
 - retrieve query select database_tablename from t720_work_tables where work_table_type_id = 1 order by database_tablename
- data range: data created or updated date and time based on specific column
 data completeness
- - N/A: not applicable for this client
 No data: applicable for this client but there is no data
